Dear Customer,

The new EU Chemicals Regulation REACh (Registration, Evaluation and Authorisation of Chemicals) came into effect from June 1, 2007.

Cotswold is fully aware of its requirements and as a Window Hardware Manufacturer we are predominantly, in terms of REACh, a downstream user of substances, preparations and articles.

As part of the compliance we assessed our suppliers who are totally committed to the regulation.

As a result of the assessments, we can ensure that the products we are supplying you are articles following the definition of REACh.

Yours Sincerely,

Brian Bunn

Design Manager
